# Iran Wind and Solar Energy Storage Power Station

## Overview

---

In 2010, Iran won a contract to build a dam in Afghanistan and the third contract to build a power plant station in Syria. [25] . In December 2005 a wind farm was put in operation at Pushkin Pass in Armenia. Total installed capacity of the farm is 2.64 MW, comprise from the four 660 kW wind turbines.OverviewBy 2012, had roughly 400 power plant units. By the end of 2013, it had a total installed electricity generation capacity of.

Electric power industry in Iran has become self-sufficient in producing the required equipment to build power plants. While most of the electricity generators are run by the government, the equipment producers and contra.

Company, Sahand, Bistoun, Shazand, Shahid Montazeri, Tous, Shahid Rajaei and Neishabour power stations are among the profit-making plants. Work on privatizing them was scheduled to be finalized b.

The new energy/electricity bourse will be inaugurated in 2012. This will bring about more competition and transparency in Iran's electricity market. Experts believe that following the launch of the .

In addition to the above power plants, there was 1800 MW cumulative installed capacity in 2011, which belonged to small scale , some of which were not connected to the national grid, and many.
