|---|---------------------------|----|---------------------------|
| 1 | PCS Module                | 6  | OPV2 side circuit breaker |
| 2 | Battery room              | 7  | High Volt Box             |
| 3 | Grid side circuit breaker | 8  | BAT side circuit breaker  |
| 4 | Load side circuit breaker | 9  | LCD display screen        |
| 5 | OPV1 side circuit breaker | 10 | MPPT                      |

## Overview

---

How can battery energy storage help Jamaica?

Battery energy storage systems (BESS) are now emerging as a cornerstone technology to address these challenges—helping Jamaica stabilize its grid, unlock more renewable energy, and reduce electricity costs for both consumers and businesses. The country's electricity cost can reach as high as \$0.32 per kilowatt-hour, far above global averages.

Why should a company invest in battery storage in Jamaica?

By integrating battery storage with rooftop solar systems or hybrid microgrids, Jamaican companies can maximize renewable use while gaining financial savings and branding advantages. Beyond the city centers, many Jamaican communities live in remote or coastal areas with limited access to stable electricity.

Why is energy storage important in Jamaica?

Jamaica is committed to reducing its dependence on imported fossil fuels. The country's National Energy Policy sets an ambitious target: 50% of electricity from renewable sources by 2037. Energy storage plays a critical role in achieving this target. Key policy support includes:

Are microgrids the future of energy in Jamaica?

Microgrids reduce diesel fuel dependency, extend energy access, and promote community-level energy independence. These modular systems can scale with demand and offer a sustainable alternative to costly grid expansion. Battery energy storage systems are no longer optional—they are essential to Jamaica's clean energy future.

Why should you use a commercial solar battery in Jamaica?

For sectors such as hospitality, tourism, and logistics—which are vital to Jamaica's economy—battery storage ensures smoother operations, lower

electricity bills, and protection against blackouts. One recommended option for Jamaican enterprises is the 215kWh Commercial Solar Battery.

Does Jamaica's energy consumption support low value added activities?

In essence, Jamaica's energy consumption has been increasing at a much faster pace than the expansion of the economy. This could mean that Jamaica's increasing electricity consumption is supporting low value added activities. If the same electricity resource was targeted toward higher value added activities, Jamaica could increase GDP per capita.
