Japanese performance energy storage battery customization

Overview

How many battery storage projects will Stonepeak and CHC develop in Japan?

Stonepeak and CHC's energy storage platform will develop five new battery storage projects in Japan. These projects have a combined capacity of 348 megawatts (MW). The deals were finalized under Japan's Long-term Decarbonization Auction. These projects were selected as part of Japan's latest long-term auction focused on low-carbon energy.

What factors influence the battery storage industry in Japan?

The Battery Storage industry in Japan is influenced by several key factors. Firstly, the regulatory environment is crucial, as government policies promote renewable energy integration and energy storage solutions. The Feed-in Tariff (FiT) and Feed-in Premium (FiP) schemes encourage investments in battery storage technologies.

Why should you invest in Japan's battery storage sector?

Global market relevance is underscored by Japan's position as a leader in advanced battery manufacturing, particularly in lithium-ion technologies. As the world moves toward electrification and renewable energy sources, Japan's battery storage sector is poised for significant growth, making it an attractive area for investment and research.

Can Eku energy commercialise large-scale batteries in Japan?

For Eku Energy, the LTDA is important to the business model of its Japanese projects but the developer, perhaps best known for projects in the UK and Australia, sees three pathways to commercialisation for large-scale batteries in Japan. The company secured a 20-year tolling agreement for its first Japan project, the 30MW/120MWh Hirohara BESS.

Does Japan have a grid-scale battery market?

As Japan takes a leading role in Asia's grid-scale energy storage market, it's

attracting international companies, including players like Tesla, which is known for its large-scale battery storage product, the Megapack. Japan NRG examines the latest trends in Japan's grid-scale battery market.

What is Japan's first energy storage project?

In 2015, we started Japan's first demonstration project covering energy storage connected to the power grid in the Koshikishima, Satsumasendai City, Kagoshima. This project is still operating in a stable manner today. One feature of our grid energy storage system is that it utilizes reused batteries from EVs.
