Overview

Why should you choose energy solutions in Kosovo?

Clean energy solutions designed to enhance efficiency and sustainability for homes across Kosovo. Comprehensive energy systems tailored to meet the unique needs of businesses locally and regionally. Advanced energy infrastructure solutions optimized for industrial operations in Kosovo and surrounding areas.

What is a low voltage hybrid inverter?

Unleash the full potential of our advanced low voltage hybrid inverter with 200% PV oversizing, high power input, and flexible compatibility with multiple battery types. The low startup voltage extends MPPT operation times, and with built-in shadow tracking. It also supports a Micro-grid setup that transforms your existing grid-tied system.

What is a Curren Hesp inverter?

Max. Output Curren HESP series is a new solar hybrid inverter, which integrates solar energy storage & mains charging energy storage and AC sine wave output.

What can teravolti do for Kosovo?

Advanced energy infrastructure solutions optimized for industrial operations in Kosovo and surrounding areas. Innovation in: North Macedonia, Albania, and partnerships across Europe, Asia, and North America. Explore our project portfolio and see how Teravolti is transforming Kosovo and the region with clean, sustainable solar energy solutions.

How many MPP trackers does an inverter have?

It boasts three MPP trackers, each capable of handling an input current of 16A, which allows it to accommodate high-efficiency, large modules and significantly boost power generation. Featuring an integrated SPD II module,

this inverter cuts down on external labor and wiring costs associated with installation.

What is a SPD II inverter?

Featuring an integrated SPD II module, this inverter cuts down on external labor and wiring costs associated with installation. Additionally, its local AP mode alongside remote Wi-Fi dual monitoring ensures optimal performance, convenience, and stability, providing users with a superior inverter experience.
