## Overview

---

How many solar power plants are there in Laos?

However, by the end of last year, only eight solar power projects and four biomass power plants were in operation, with an installed generation capacity of 116 MW, representing just 1% of the country's total electricity production. As of early 2023, Laos produced power from 76 hydropower dams, with another 43 still under construction.

Why is solar power important in Laos?

Solar power has improved the livelihoods of local people. For people living off-grid in remote villages in Laos, solar energy offers a clean, sustainable way to bring electricity for all, and the promise to transform their lives.

How much does electricity cost in Laos?

To its credit, state-run electricity company Electricité du Laos (EDL) is trying to encourage more solar power development by offering a tariff rate of USD 0.08 per kilowatt-hour (kWh). That's higher than the rate for hydropower-generated electricity, which ranges from USD 0.05 to 0.06 per kWh.

How can solar energy help people living off-grid in Laos?

For people living off-grid in remote villages in Laos, solar energy offers a clean, sustainable way to bring electricity for all, and the promise to transform their lives. For people living off-grid in remote villages in Laos, solar energy offers a clean, sustainable way to bring electricity for all, and the promise to transform their lives.

Does Laos have a power grid?

It even has two electricity grids, one for exporting power and one for domestic usage. Laos relies on hydropower and lignite (brown coal) for most of its power generation, making up 83% and 16% of the mix, respectively.

Why does Laos suffer from energy instability?

However, Laos generally suffers from energy instability because most of its power plants are owned by international businesses and generate electricity for export. It even has two electricity grids, one for exporting power and one for domestic usage.
