# Large Energy Storage Vehicle Numbering Rules

## Overview

---

As an important first step in protecting public and firefighter safety while promoting safe energy storage, the New York State Energy Research and Development Authority (NYSERDA) developed the first comprehensive set of guidelines for reviewing and evaluating battery energy storage systems.

As an important first step in protecting public and firefighter safety while promoting safe energy storage, the New York State Energy Research and Development Authority (NYSERDA) developed the first comprehensive set of guidelines for reviewing and evaluating battery energy storage systems.

**New York Battery Energy Storage System Guidebook** In 2019, New York passed the nation-leading Climate Leadership and Community Protection Act (Climate Act), which codified aggressive climate and energy goals, including the deployment of 1,500 MW of energy storage by 2025, and 3,000 MW by 2030. Over.

An overview of the relevant codes and standards governing the safe deployment of utility-scale battery energy storage systems in the United States. This document offers a curated overview of the relevant codes and standards (C+S) governing the safe deployment of utility-scale battery energy storage.

in New York that is supported by the U.S. Department of Energy and the State of New York. This DG Hub guide is designed to provide building owners and project developers with an understanding of the permitting and interconnect on requirements and approval processes for energy storage systems (ESS).

In 2019, New York passed the Climate Leadership and Community Protection Act, which includes some of the most ambitious energy and climate goals in the country, including plans for achieving 3 gigawatts of energy storage capacity by 2030. In late 2022, NYSEDA and the NYSDPS outlined a roadmap.

The FDNY rule covers only outdoor installations, therefore only NFPA 855 outdoor requirements are covered here. IFC coverage of batteries is similar to

NFPA 855, so is not being covered in this presentation Systems shall be remotely monitored (BMS) continuously and data being generated interpreted.

Energy storage vehicle numbers denote specific standards, performance metrics, and classifications related to energy storage systems, 2. These numbers facilitate understanding of energy capacity, charging efficiency, and overall impact on electric vehicle performance, 3. They include various. Can a motor vehicle impact a energy storage system?

Where energy storage systems are subject to impact by a motor vehicle, including fork lifts, vehicle impact protection shall be provided in accordance with Section 312 of this code. 1206.11.6 Combustible storage. Combustible materials shall not be stored in energy storage system rooms, areas, or walk-in energy storage system units.

What is the battery energy storage system guidebook?

The Battery Energy Storage System Guidebook (Guidebook) helps local government officials, and Authorities Having Jurisdiction (AHJs), understand and develop a battery energy storage system permitting and inspection processes to ensure efficiency, transparency, and safety in their local communities.

Are battery energy storage systems permitted in a zoning district?

Tier 1 Battery Energy Storage Systems shall be permitted in all zoning districts, subject to the Uniform Code and the "Battery Energy Storage System Permit," and exempt from site plan review. 7. Permitting Requirements for Tier 2 Battery Energy Storage Systems.

How far should a mobile energy storage system be from the public?

An approved fence with a locked gate or other approved barrier shall be provided to keep the general public at least 5 feet (1024 mm) from the outer enclosure of a deployed mobile energy storage system. 1206.17.7.6 Smoking. Smoking shall be prohibited within 10 feet (3048 mm) of mobile energy storage systems.

What if I have any questions about the battery energy storage system permit?

If you have any questions about the Battery Energy Storage System Model Permit, please email questions to [cleanenergyhelp@nyserda.ny.gov](mailto:cleanenergyhelp@nyserda.ny.gov) or request

free technical assistance at [nysenda.ny.gov/Energy-Storage-Guidebook](https://nysenda.ny.gov/Energy-Storage-Guidebook). The NYSERDA team looks forward to partnering with communities across the State.

What is a 306.1 energy storage system?

306.1 Energy storage systems. The installation, operation, maintenance, repair, and retrofitting of energy storage systems shall be in accordance with Section 1206 of the Fire Code of New York State. 58 Questions?
