

## SolarTech Power Solutions

# Latest Cameroon energy

---

### INTEGRATED DESIGN

EASY TO TRANSPORT AND INSTALL,  
FLEXIBLE DEPLOYMENT

## Overview

---

Officially launched on August 1, 2025, the licensing round offers nine highly prospective blocks – six in the Douala Kribi-Campo Basin and three in the Rio Del Rey Basin – representing a strategic opportunity to attract new investment into one of Africa’s most geologically diverse.

Officially launched on August 1, 2025, the licensing round offers nine highly prospective blocks – six in the Douala Kribi-Campo Basin and three in the Rio Del Rey Basin – representing a strategic opportunity to attract new investment into one of Africa’s most geologically diverse.

The low electricity supply rate is a major cause of underdevelopment in Cameroon. To address this issue, Cameroon outlined a strategy in 2003 aiming for a production capacity of 3000 MW by 2020. However, by 2020, production had only reached 1040 MW, leading Cameroon to devise a new national.

In rural Cameroon, 75% of the population remains without electricity, even though many live near the grid. The Nachtigal Hydropower Plant financed by the World Bank Group together with partners, will increase Cameroon’s power generation capacity by 30%. In addition to hydropower, Cameroon is.

The African Energy Chamber views Cameroon’s 2025 bid round as a bold step toward revitalizing exploration and advancing sustainable energy development across Central Africa. Cameroon is making a strong play for future oil and gas production, with its latest licensing round paving the way for.

The government of Cameroon has unveiled an ambitious plan to connect 8 million people to its national grid in an effort to achieve universal electricity access by 2030. Speaking at the Africa Energy Forum in Cape Town, South Africa, Cameroon’s Minister of Water and Energy, Gaston Eloundou Essomba.

In the energy domain, there are many different units thrown around – joules, exajoules, million tonnes of oil equivalents, barrel equivalents, British thermal units, terawatt-hours, to name a few. This can be confusing, and make

comparisons difficult. So at Our World in Data we try to maintain.

(Business in Cameroon) - Cameroon needs \$12 billion, or CFA7,200 billion, to overhaul its power sector, Minister of Water and Energy Gaston Eloundou Essomba told the Africa Energy Forum in Cape Town. The forum, a major event for the African energy sector, ran from June 17 to June 20, 2025. On June.
