Overview

What is Canadian energy storage?

The blueprint for Canadian energy storage. Located in Haldimand County, Ontario, Oneida Energy Storage is a fully operational, 250 MW/1,000 MWh lithium-ion battery energy storage facility. It represents Canada's largest operational energy storage facility, and is amongst the largest energy storage projects globally.

Why do energy storage Canada members need government?

"Energy Storage Canada members are at the forefront of the energy transition and need government to ensure that BC's electrical grid remains reliable, renewable and affordable with diverse energy storage resources," says former B.C.

What is the Oneida energy storage project?

Oneida Energy Storage Project in Haldimand County, Ontario (May 2025). "Not only does the project create value for Ontario ratepayers and our community, our involvement highlights the importance of Indigenous partnership and inclusion; it exemplifies what can be accomplished together," said SNGRDC president & CEO Matt Jamieson.

What is an energy storage system?

A rendering of energy storage systems to feed Ontario's power grid. (Submitted by NextStar) An ESS is a large rechargeable battery unit that stores energy during off-peak hours — and provides backup power during grid outages.
