Libya power generation container sales

Overview

How much energy does Libya need in 2022?

Fossil fuels met nearly all of Libya's energy demand, with oil accounting for 57% and natural gas accounting for almost 43% in 2022. Rooftop solar projects met less than 1% of the remaining energy demand.¹⁵

How much electricity does Libya produce a year?

Libya's electricity generation has declined overall since 2013, and output was an estimated 30 terawatt-hours (TWh) of power generation in 2022.⁶² Over a decade of civil war and insufficient maintenance and investment in aging plants and equipment reduced Libya's ability to produce electricity.

Does Libya have a power supply shortage?

Libya has nameplate-installed capacity of 10 GW, but effectively installed capacity stands at around 7.5 GW and barely 5.5 GW are available in practice due to spare parts and fuel shortage. This situation results in about 25% power supply shortage. Electricity comes mostly from thermal generation comprising various technologies.

Does Libya produce condensate & natural gas plant liquids?

Libya's natural gas fields produce condensates and natural gas plant liquids (NGPL) and contribute relatively small volumes to the country's total petroleum and other liquids production. We estimate that condensate and NGPL production was less than 100,000 b/d in 2023.²⁷

Does Libya have a bgup project?

61 Eni, Financial Results, 2024 Second Quarter Results, page 18; Middle East Economic Survey, "Libya Gas Exports At 13-Year Low," March 8, 2024; Saipem, Press Releases, "Saipem: awarded offshore contract for BGUP project in Libya worth approximately 1 billion USD," September 8, 2023.
