Liquid Cooled Energy Storage Battery Cabinet Purchase

Overview

What is a Bess 365kwh energy storage system?

BESS-365kWh Liquid-Cooled Energy Storage System The BESS-365kWh provides a strong balance between capacity and space-saving design, making it a cost-effective solution for commercial and medium-scale industrial use. Equipped with high-efficiency cooling and energy-dense LiFePO$_4$ cells, it offers high reliability and reduced maintenance.

How many temperature detectors does a battery module have?

Each battery module has 8 temperature detectors. There are 2 racks that fit in a single battery cabinet, 9 slots in each battery rack to accommodate 8 battery modules and total 1 BSPU (Battery Switch & Protective Unit). Racks are connected in parallel and paired with a system BMS to meet the power and energy requirements of the application at hand.

What is a battery rack?

Each battery rack contains a rack-level BMS. The positive (+) and negative (-) terminals of the battery modules are clearly marked and are designed for the convenience of connection, visual check, examine, and repair. The external casing is made of metal covered by insulating materials.

What is a battery module made of?

The external casing is made of metal covered by insulating materials. For example, the top cover is made of PP, the bottom base is made of aluminum. The copper bars and screws are connected internally to prevent short circuit to ensure the electrical safety of the battery module. Each battery module has 8 temperature detectors.

How many battery cells are in a battery rack?

All wire connections are placed on the front side of the rack to allow easy installation and maintenance. Since each battery rack hosts 8 battery modules

and each battery module has 52 battery cells, each battery Rack has a total of 416 battery cells connected in series.
