Lithuania Energy Storage Container Power Station Project

Overview

In September 2025, Finnish company Olana Energy acquired a 70 MW / 140 MWh project in Šalčininkai from UK-based Aura Power. Co-developed with Lithuanian partner Balancy Grid, the project is designed for a two-hour storage duration and will connect to the 110 kV.

In September 2025, Finnish company Olana Energy acquired a 70 MW / 140 MWh project in Šalčininkai from UK-based Aura Power. Co-developed with Lithuanian partner Balancy Grid, the project is designed for a two-hour storage duration and will connect to the 110 kV.

Helsinki's Capalo AI has entered into a partnership to provide its trading and optimization services to a 70 MW / 140 MWh BESS in Šalčininkai, a city in Lithuania. The Šalčininkai BESS is a standalone system owned by fellow Finnish company Olana Energy, scheduled for commercial operation in the.

IPP E energija Group has started building what it claims is the largest 'private' BESS project in Lithuania, a few weeks after the Baltic region decoupled from Russia's electricity grid. The 120MWh battery energy storage system (BESS) project near Vilnius, the capital of Lithuania, will come online.

Helsinki, 1.7.2025 —E energija group and Capalo AI have signed an agreement to trade and optimize the 120 MWh Vilnius Battery Energy Storage System (BESS), currently under construction near Vilnius. Scheduled to be operational by the end of 2025, the facility will increase Lithuania's national.

tability of energy supply in Lithuania. It will also enable Lithuania to disconnect from the Russian controlled electricity grid and synchronize with the an instantaneous electricity reserve. Energy cells signed a contract with the winning Siemens Energy and Fluence consortium. Energy storage facil.

National Agenda "National Strategy for Energy Independence" (hereinafter referred to as "the Strategy") has been developed to implement fundamental changes in the energy in the energy sector - to ensure that Lithuania produces enough energy resources, as much as it consumes, and to make the energy.

As the global shift toward renewable energy gains momentum, countries like Lithuania are making bold moves to secure a cleaner, more resilient energy future. Enter Project Boston - a groundbreaking 43MWh/180MWh Battery Energy Storage System (BESS) that's poised to become one of the largest of its kind.
