

## SolarTech Power Solutions

# Low-cost lithium battery management system BMS

## Overview

---

What is a low-cost battery management system (BMS)?

This project is a rewrite of [low-cost-bms] for a new hardware platform based on the cheap and powerful STM32. A BMS, or battery management system, is an essential part of any multi battery Lithium battery pack (eg. LiFePO4).

Are low-cost BMS for Li-ion batteries suitable for low-power applications?

In this paper, low-cost BMS for Li-ion batteries is designed and developed for low-power applications and Photovoltaic (PV) systems. A literature search of BMS and battery types is conducted and studied to develop a suitable methodology of design low-cost BMS for low-power applications.

Is a PLC-based battery management system suitable for lithium-ion batteries?

In this study, a PLC-based BMS has been developed for lithium-ion batteries to address the challenges encountered in microcontroller-based battery management systems. The developed system is designed with a passive balancing method comprising PLC, modules, and auxiliary hardware.

Do batteries need a battery management system?

Batteries are used to store energy, but they need proper care, especially in critical applications that need safety and long-term reliability, so a battery management system (BMS) is required for these features. In this paper, low-cost BMS for Li-ion batteries is designed and developed for low-power applications and Photovoltaic (PV) systems.

What is a programmable logic controller (PLC) based BMS for lithium-ion batteries?

In this study, a Programmable Logic Controller (PLC) - based BMS proposal for lithium-ion batteries has been presented, aiming to address the challenges in existing BMSs. The developed system is a passive balancing BMS comprised of controller PLC modules and auxiliary hardware.

How much does a hybrid battery management system cost?

With almost full capabilities at partial costs, hybrid BMS presents excellent middle-ground options for many lithium battery applications. Average hybrid BMS price range: \$800-\$1,500. Capabilities and pricing can vary widely for BMS. Here are 6 of the leading global manufacturers serving both consumer and industrial lithium battery markets:
