Blueleaf Energy, owned by Australia's Macquarie Asset Management, and Chemsain Sustainability.

Sungrow has agreed to supply battery energy storage system (BESS) technology to a large-scale project in Malaysia, one of Southeast Asia's biggest projects of its type. The energy storage arm of Chinese solar PV inverter manufacturer Sungrow announced the signing of an agreement earlier this week.

Battery energy storage systems (BESS), once relegated to the margins of policy discussions, are fast becoming a keystone in Malaysia's energy transformation story. As solar and other renewables take up greater shares of the generation mix, the national grid's growing complexity demands a reliable.

The project is completed in 2024, the Malaysian region ushered in a landmark energy project - 355KW1075KWH energy storage project. This project is not only one of the energy storage projects in Malaysia, but also of great significance to enhance the stability and flexibility of the local power.
