Malta adds new energy solar site

Overview

A new solar farm at the Lapsi Reverse Osmosis Plant, featuring almost 900 solar panels, has been connected to the electricity grid. In a statement, the energy ministry said the €600,000 solar farm comprises 888 solar panels and is set to generate approximately 820,000 kWh of clean.

A new solar farm at the Lapsi Reverse Osmosis Plant, featuring almost 900 solar panels, has been connected to the electricity grid. In a statement, the energy ministry said the €600,000 solar farm comprises 888 solar panels and is set to generate approximately 820,000 kWh of clean.

A €10 million investment to shift to renewable energy; additional benefit for Gozo households Over €10 million investment in renewable energy grants will support households in their shift to sustainable energy. This was announced by the Minister for Energy Miriam Dalli, who explained that this.

Malta is working steadily to reduce its dependence on fossil fuels and embrace renewable energy as part of its long-term climate commitments. Backed by legally binding targets, a clear regulatory structure, and support schemes for both households and businesses, Malta's energy transition is shaped.

A new solar farm at the Lapsi Reverse Osmosis Plant, featuring almost 900 solar panels, has been connected to the electricity grid. In a statement, the energy ministry said the €600,000 solar farm comprises 888 solar panels and is set to generate approximately 820,000 kWh of clean energy annually.

A site located within Malta's territorial waters has been identified as the potential location for the country's first grid-connected floating solar project, Maltese Minister for Environment, Energy and Enterprise Miriam Dalli announced. Map indicating a potential preferred area for a 50MW PV farm.

Developers constructing properties up to the maximum height limit will be required to install photovoltaic panels or other renewable energy sources on rooftops. Abigail Cutajar, CEO of the newly established Climate Action Authority, announced the measure during a TVM discussion programme.

The Maltese government has unveiled a new renewable energy scheme poised to transform the nation's energy landscape. This ambitious initiative provides substantial grants for large-scale solar and wind projects with a capacity of at least 40MW. The scheme also integrates energy storage solutions.
