The government has received 16 offers for the development of Malta's first large-scale utility battery energy storage systems, Minister for the Environment, Energy and Public Cleanliness Miriam Dalli told The Malta Independent. Interconnect Malta had launched the procurement process for the design.

"Utility-scale battery storage is a game changer for the electric grid. It provides the flexibility and resilience needed to accommodate increasing amounts of renewable energy, reducing reliance on fossil fuels and paving the way for a cleaner, more sustainable energy future." renewable energy.

CAMBRIDGE, Mass.-- (BUSINESS WIRE)--Malta Inc., a leader in long-duration energy storage, today announced that it has closed on a round of financing provided by a group of investors including Siemens Energy Ventures and Alfa Laval as well as existing shareholders Breakthrough Energy Ventures.

Malta's Pumped Heat Energy Storage (PHES) technology is based on a high-temperature heat-pump electricity storage system for large-scale long-duration energy storage (LDES). This technology is well-suited to the changing energy landscape, with the potential for discharge duration capabilities of.
