Mauritania Telecommunication Base Station Inverter Market

Overview

How is Mauritania's telecom sector performing?

Mauritania's small population and low economic output has limited the country's ability to develop sustained growth in the telecom sector. Relatively low disposable income has restricted growth in the use of services, and thus of revenue which telcos can hope to gain from subscribers.

Which mobile networks are used in Mauritania?

Most voice and data services are carried over the mobile networks maintained by the recently rebranded Moov Mauritel, Mattel, and Chinguitel. [read more](#) . Last section of Mauritania's 4,000km fibre backbone network is completed; Mauritania improves international bandwidth through connecting to the EllaLink submarine cable system;.
