

SolarTech Power Solutions

Mobile Energy Storage Cabin Customization Solution

5 Years
warranty

Overview

Why is mobile energy storage a stranded asset?

Stationary storage lacks flexibility, suffers from low utilization and from the risk of becoming a stranded asset. Power Edison addressed these issues by developing mobile energy storage platforms: TerraCharge™ and AquaCharge™ for mobile land-based and water-based mobile energy storage respectively.

Can a power Edison mobile ESS be purchased or leased?

To add even more flexibility, Power Edison mobile ESS's can be purchased, rented or leased. Power Edison's comprehensive offerings include regulatory policy support, grid analytics, customized engineering designs, project finance and operations and maintenance.

Why do energy storage systems matter?

Energy storage systems enable a smarter and more resilient grid infrastructure through peak demand management, increased integration of renewable energy and through a myriad of additional applications. However, grid challenges are dynamic, appearing at different times and locations over the years.

Why is a storage mobile a good idea?

Making storage mobile allows utilities to dispatch storage systems to match shifting demand and defer costly upgrades to the grid. It also enables businesses to send batteries to where power is needed most, like Canada in winter and Brazil in summer.
