

SolarTech Power Solutions

Mobile power supply that can be connected to the battery cabinet

Overview

Why do mobile devices need battery chargers and fuel gauges?

Battery Chargers and Fuel Gauges Mobile devices require high-capacity rechargeable batteries to provide system power. These systems typically use Li+ batteries due to their light weight and large energy density. Our battery chargers offer a variety of features, which enable accurate and robust designs to ensure safe battery-charging solutions.

Are AMP portable power stations rechargeable?

Our portable power stations can be configured with AC, DC, and USB ports customized to your specifications. A quiet alternative to gas generators, AMP Portable Power Stations are rechargeable and ready to go anywhere you need an off-grid source of rugged, reliable power.

How do OEM rechargeable batteries work?

Our OEM rechargeable battery packs perform to your precise specifications and incorporate a battery management system (BMS) to constantly monitor and optimize performance. We use Tier 1 cells, sourced from trusted domestic and international suppliers, to provide superior energy density, exceptional safety, and a longer lifespan.

Is apex mobile power a good battery?

Intrinsically Safe. Waterproof. Low Temperature. It isn't just a battery, it's a complete power ecosystem. Apex Mobile Power's integrated battery solutions combine optimized cell architecture, durable enclosures, and custom firmware to meet the demands of today's most complex applications.

Why do battery-operated devices need a boost converter?

Battery-operated devices often require boost converters to increase battery voltage for peripheral device power. The boost converter must maintain high efficiency throughout battery life, where battery voltage will vary. The

MAX8969 (Figure 35) features Auto-Track Mode (ATM) to maintain high efficiency for a wide range of input voltages.

Can AMP provide power wherever you need?

AMP's energy storage systems can provide power wherever you need, scaled to meet your most demanding power needs. Our portable power stations can be configured with AC, DC, and USB ports customized to your specifications.
