Mobile wind and solar power in Slovenia

Overview

How many solar power plants are there in Slovenia?

The number of solar power plants in Slovenia has increased a lot in recent years and today their total power is approximately 368 MW and cumulative production of 2.6 % electricity. From Table 2 it is clear that main contribution on predicted RES are solar power plants.

What are the RES of primary energy in Slovenia?

RES of primary energy in Slovenia are water flows, wood, other biomass energy and solar radiation. Direct use of wood biomass is fairly limited to the use in boilers and to the direct combustion.

Are there geothermal power plants in Slovenia?

Currently there are no geothermal power plants (GPP) in Slovenia, but the potential does exist. The geological and tectonic environment of Slovenia is quite complicated, as it is divided into several tectonic units with different hydrogeological characteristics and geothermal conditions.
