Moldova 88MWh Energy Storage Power Station Project

Overview

How long will a 125 MW power plant last in Moldova?

The decision, approved today by the Commission for Exceptional Situations, provides for the free transfer to Moldova of a 125 MW power plant and 10 smaller plants with a combined capacity of 100 MW. The smaller plants could be installed within three to five months.

Will a new power plant increase Moldova's electricity generation capacity?

According to Constantin Borosan, State Secretary of the Ministry of Energy, once installed, these plants will increase Moldova's electricity generation capacity by at least 125 MW, and if the 10 smaller plants are received, the total will reach 225 MW.

Does Moldova need a European Union civil protection mechanism?

The Republic of Moldova has requested the activation of the European Union Civil Protection Mechanism, seeking international assistance for the urgent installation of new electricity generation capacities.
