Moldova advances renewable energy with a 22-MW solar farm in Ialoveni, featuring 16.512 MWh storage, commissioned by SRL TPI-PHARM. Moldova's government has approved a 22-MW solar farm project, which includes 16.512 MWh of storage capacity. The project will be developed in the central district of Ialoveni.

State Secretary of the Ministry of Energy Constantin Borosan, at the EU4Energy Policy Forum in Copenhagen, has unveiled the vision of Moldova regarding the development of a sustainable energy system, with a focus on increasing energy storage capacities and integrating renewable sources. According to him, the government is committed to achieving a 22-MW solar farm in Ialoveni by 2025.

Chisinau, Republic of Moldova September 3, 2025 - In the shadow of Russia's war in Ukraine and multiple energy crises Moldova has turned to renewable energy to build a future that is more secure and more affordable. The effort is being led by a collection of public and private investments - big and small.

Moldova is advancing its renewable energy plans with the construction of two solar power plants. One will be located in Rădeni, Strășeni district, with a 50 MW capacity, while the other, in Negurenii Noi, Telenești district, will have a 40 MW capacity.

MW capacity. Both plants are expected to be operational by the.

The Republic of Moldova will install a 75 MW energy storage system (BESS) and 22 MW internal combustion engines as part of a project funded by the U.S. Government through USAID. The Ministry of Energy has announced that a tender has been launched for this purpose. The project, backed by the German.
