Morocco is accelerating its energy transition by issuing a global call for expressions of interest to build two large-scale battery storage facilities. The projects are spearheaded by the Moroccan Agency for Sustainable Energy (MASEN) and Morocco's national electricity company ONEE. On May 20.

Morocco recorded a surge of energy agreements in 2025 across renewable power, gas infrastructure, and battery storage, marking one of the country's most active years in the sector, according to a new report by the Attaqa energy platform. The report described 2025 as a "landmark year" for Morocco's.

Morocco's National Office for Electricity and Drinking Water (Onee) has yet to appoint a transaction adviser for its planned battery energy storage projects. A local media report, citing Onee, reported that the North African state plans to invite bids for a battery energy storage system (bess).

Le Morocco takes a new step in its energy transition strategy with the launch of the project " Morocco Energy Storage Testbed ", a battery energy storage test platform. This pilot program, supported by the Moroccan Agency for Sustainable Energy (Masen), received World Bank approval for a \$4,5.

Morocco's 2026 draft finance bill reinforces the country's long-term plan to expand renewable energy, launch major gas and hydrogen projects. Mohammedia - Since launching its National Energy Strategy in 2009, Morocco has been working to raise the share of renewable energy to 52% of the

installed.
