

SolarTech Power Solutions

Netherlands liquid flow battery

Overview

AQUABATTERY is an acid-base flow battery based on reversible water dissociation, developed in the Netherlands. The battery stores electricity in the form of chemical energy in acid, base and saltwater solutions, which are kept in separate tanks.

AQUABATTERY is an acid-base flow battery based on reversible water dissociation, developed in the Netherlands. The battery stores electricity in the form of chemical energy in acid, base and saltwater solutions, which are kept in separate tanks. Pumps circulate these fluids through a power stack.

Flow batteries store energy in liquid electrolytes within external tanks, offering scalable, long-cycle energy storage for grid stability, renewable integration, and backup power systems. What are Flow Batteries?

Flow batteries are a type of chemical energy storage where energy is stored in liquid.

The technology is affordable and easy to scale, which means we can speed up the spread of Elestor flow batteries to store large volumes of electricity over long durations. Find out why we dedicate our lives to a sustainable future and discover how we help shape a new, clean energy system that will.

Long duration energy storage (LDES) is key to achieving the EU's 2030 energy and climate goals by enabling the integration of renewable energy sources like wind and solar into the grid, explains Jiajun Cen, co-founder and CEO of AQUABATTERY - the company behind the saltwater battery pilot. LDES.

Norwegian renewables company Statkraft and Dutch climate tech start-up Aquabattery partner to develop a promising technology to improve long-term storage of electricity through a flow battery made with salt water. Aquabattery

has developed a Long Duration Energy Storage (LDES) flow battery.

AQUABATTERY, a Dutch startup specializing in developing saltwater long-duration energy storage solutions, secured a €6 million (~\$6.4 million) seed investment led by EIT InnoEnergy and supported by InnovationQuarter, Invest-NL, Init Power, and a group of business angels. The company's technology is.
