

## SolarTech Power Solutions

# Netherlands sodium-ion battery energy storage project

## Overview

---

The Netherlands is now starting a research project on sodium batteries. Nobian and Exergy Storage, University of Twente and innovation platform ISPT are launching a collaboration in the project STARBATCHE - aimed at developing a new battery technology that uses sodium instead of lithium.

The Netherlands is now starting a research project on sodium batteries. Nobian and Exergy Storage, University of Twente and innovation platform ISPT are launching a collaboration in the project STARBATCHE - aimed at developing a new battery technology that uses sodium instead of lithium. In addition.

Netherlands-based startup Moonwatt plans to commercialise an energy storage solution for hybridisation with solar using two big technological deviations from today's industry standard - we hear more from the firm's CEO and COO. CEO Zukui Hu, CCO Valentin Rota and CTO Guillaume Mancini met nine.

We are excited to announce the STARBATCHE project, a collaboration with Nobian, Exergy Storage, the University of Twente and ISPT. The project aims to develop a new battery technology using sodium instead of lithium. In addition to developing the technology needed for the energy transition, the.

Powering Europe with safe, efficient, and sustainable sodium-ion battery technology. Learn how we are building safer, scalable battery technologies made entirely in Europe. Explore the vision, goals, and team behind ATENA+. Discover the methodologies driving our innovative sodium-ion battery.
