How much does a 440w solar panel cost in New Zealand?

A single 440W solar panel in New Zealand costs around \$230. But panels are just one part of the puzzle - you'll also need an inverter, mounting gear, and professional installation to turn those panels into a fully functioning solar power system. Find out how to choose solar panels here. Should I Wait For The Price Of Solar To Fall?

.

How many solar panels do I need in New Zealand?

Figuring out how many solar panels you need for your home in New Zealand doesn't have to be a head-scratcher. It all comes down to your household's energy habits, roof space, and how much sunshine your area gets. Most Kiwi homes opt for systems between 4kW and 8kW, which translates to around 9 to 19 solar panels.

Do solar panels work in New Zealand?

Solar panels work when the sun is shining, which we regularly experience even in the cooler parts of the country. This means that many homes across New Zealand would be good candidates for solar energy systems. Solar panels can help offset some of the cost of your power bill and provide a long term solution to growing power bills.

Will New Zealand's energy competition Taskforce changes lead to more solar power?

RNZ's Susan Edmunds reports on the Energy Competition Taskforce proposals and says the changes "should lead to New Zealanders with solar power systems on their houses get more of a return for any power they put back into the system".

What are the cheapest power companies in New Zealand?

Powershop is one of the cheapest power companies in New Zealand. Plus, if you want additional options in your power, you only have to pay a little extra! Nova Energy is one of the pioneer power providers in New Zealand. Servicing Kiwis for over 60 years, you can expect comprehensive and accurate plans that will fit your needs.
