

SolarTech Power Solutions

New Zealand s Ke Telecom PV Site

Overview

Named Buckleys Road Solar Farm, the project, being developed in partnership with KeaX Limited, features 104 hectares of solar arrays across a 111-hectare site. What is New Zealand's First Solar PV project?

New Zealand renewables developer Lodestone Energy has started constructing its first solar PV project on the country's South Island, with a total generation capacity of 27.7MW. Located in South Canterbury, the Clandeboye solar PV power plant will supply clean energy to the milk processing and irrigation industries in the area.

What happened to Tauhei solar park?

Harmony Energy Limited and First Renewables Limited have confirmed the financial close of the Tauhei Solar Park project, a 150-MW solar farm that will be the largest in the country. Construction will begin this year, which will represent a major step in the transition towards cleaner energy in New Zealand.

Is lodestone energy developing a solar PV plant on South Island?

Lodestone Energy is also developing a 220MW utility-scale solar PV plant on New Zealand's South Island. Image: Lodestone Energy. New Zealand renewables developer Lodestone Energy has started constructing its first solar PV project on the country's South Island, with a total generation capacity of 27.7MW.

What is lodestone energy doing in Aotearoa New Zealand?

Lodestone Energy is taking Aotearoa New Zealand's solar production to a new level. Harnessing the power of the sun, Lodestone's solar farms are increasing the supply of renewable energy to local networks and the national grid. In our Phase 1 programme we are developing five solar farms in Kaitaia, Edgecumbe, Waiotahe, Whitianga and Dargaville.

Does Te Herenga o te r use agrivoltaics?

The Te Herenga o Te Rā plant (above) incorporates agrivoltaics into its design. Image: Lodestone Energy. New Zealand solar PV developer Lodestone Energy has energised its largest solar power plant to date: the 42MW Te Herenga o Te Rā site in the Bay of Plenty, a large bight on New Zealand's northern island.

What is Tauhei solar park?

Tauhei Solar Park will be connected to Transpower's 110-kV grid via the Waihou substation, which will ensure the integration of its production into the national supply. This project is being presented as model of how renewable energy can combine sustainable development, environmental protection and technological advances for the country's benefit.
