Niger communication base station power supply deployment

Overview

How are Base Transceiver Stations distributed in Nigeria?

They are distributed as follows based on their applications on sites in Nigeria: This is a Base Transceiver Station power system that has been designed in such a way that it comprises of one or two alternating current generating sets, the Automatic Transfer Switch (ATS), the Rectifier system, Back-up Batteries and the Breakers. 2.

Are telecommunication power sources a problem in Nigeria?

literature review on telecommunication power sources in Nigeria indicates that very little research and analysis has been completed on power losses/failures in Base Transceiver Station due to telecommunication equipment and complexes.

How many types of BTS power sources are used in Nigeria?

Below is the schematic diagram of the integrated three types of BTS power sources used in the present day Nigeria. Fig-2: Integrated Power Supply System layout. The figure 1 represents technical view of the entire power supply system used today for BTS operation in Nigeria.

What are the key words of Telecommunications in Nigeria?

Key Words: Base Transceiver Stations (BTS), Electrical Power sources, Rectifier, Generators, Automatic Transfer Switch (ATS), e-site, Backup systems, Hybrid Systems and Site maintenance. The telecommunications development in Nigeria since 2001 has been phenomenal.

Why is E-site power supply used in Nigeria?

The main focus or reason why e-site power supply is mostly employed in Nigeria is to generally cut a great deal of cost and still maintain at least 99.6% performance as underperformance is highly un-recommended and attracts great loss to the site manager.

What is a base transceiver station?

Base Transceiver Station with a hybrid of DC Generator, Solar Power System and Back-up Batteries: This is a Base Transceiver Station power system that has been designed in such a way that the BTS power is generated by a hybrid and synchronization of a DC generator set, solar power, and back-up batteries.
