

SolarTech Power Solutions

Nordic outdoor energy storage battery

Overview

What does Nordic batteries do?

We develop battery modules, racks and energy storage systems designed to power industrial applications across challenging sectors, including construction, maritime, defence, and grid systems. At Nordic Batteries we focus on what is important: safety, reliability and performance.

What is the largest battery energy storage project in the Nordics?

SEB Nordic Energy's portfolio company, Locus Energy, in collaboration with Ingrid Capacity, will build the largest battery energy storage project in the Nordics. The project will add 70 MW/140 MWh of storage capacity to SEB Nordic Energy's Finnish portfolio, which already includes wind and hydropower.

What is the Nordic battery collaboration?

In the Nordic region, Finland, Norway and Sweden are combining their collective strengths in the battery value chain through the Nordic Battery Collaboration. As a battery region, the Nordics have become a notable actor in the broader European battery market.

Are Nordic batteries looking for a development engineer?

Nordic Batteries are seeking a development engineer for mechanical construction and system design. Factor 47 is operative! The pilot line where Nordic Batteries will produce their first battery modules is now officially open after the visit from former Prime Minister Erna Solberg where she cut the banner to kick it off.

Does Norway have a battery market?

Today Norway has not one, but two huge battery markets. "There are two market drivers for batteries: EVs and stationary energy storage. Energy storage is coming on strong now. It's the key to turning intermittent wind and

solar into a stable energy source,” explains Pål Runde, Head of Battery Norway.

How much storage capacity does Seb Nordic energy have?

The project will add 70 MW/140 MWh of storage capacity to SEB Nordic Energy’s Finnish portfolio, which already includes wind and hydropower. Located in Nivala Municipality in Finland’s Ostrobothnia region, the project is expected to be completed in 2026.
