North Asia exports solar modules to

Overview

How many solar modules are exported from China in 2023?

The solar module exports from China in 2023 amounted to around 220 Gigawatts of generation capacity, up 33.5 per cent from 2022's 164 GW.

Will China's solar module exports remain high if trade spats continue?

However, even if trade spats continue to shrink China's share of the solar component markets in North America and Europe, fast-growing economies such as The Philippines, Vietnam, Thailand, Malaysia and South Africa look set to ensure the overall trajectory of China's solar module exports remains higher.

Which country imports the most PV modules in Asia-Pacific?

The cumulative shipment to the Asia-Pacific market was about 68.11GW, an increase of 26% compared to 53.93 GW in the same period of 2023. Among the countries in this region, Pakistan had the highest share of module shipments, importing around 16.91GW of PV modules, up 127% from 7.47GW in the same period in 2023.
