OEM and processing of lithium battery packs in South America

Overview

Is South America a key player in the lithium-ion battery industry?

As the global demand for electric vehicles (EVs) and renewable energy storage grows, South America is emerging as a key player in the lithium-ion battery industry. The region is home to some of the world's largest lithium reserves, particularly in Argentina, Bolivia, and Chile—often referred to as the “Lithium Triangle.”

Where are lithium batteries made?

The region is home to some of the world's largest lithium reserves, particularly in Argentina, Bolivia, and Chile—often referred to as the “Lithium Triangle.” In recent years, several manufacturers in South America have been developing lithium-ion battery production capabilities to meet the increasing demand for sustainable energy solutions.

What are the top 10 lithium-ion battery manufacturers in South America?

This article explores Top 10 Lithium-Ion Battery Manufacturers In South America; CATL, Companhia Brasileira de Lítio (CBL), YPF-Tec, BYD, LG Energy, Panasonic, SQM, EnerSys, Duracell, and Saft. Last Updated on February 21, 2025.

How are lithium ion batteries made?

State-of-the-Art Manufacturing Conventional processing of a lithium-ion battery cell consists of three steps: (1) electrode manufacturing, (2) cell assembly, and (3) cell finishing (formation) [8, 10].

Which countries are focusing on sustainable battery production?

For example, India is expanding its battery manufacturing capacity with a focus on sustainable processes, while South America, led by countries like Chile, is leveraging its lithium reserves to support a globally integrated supply chain.

Are lithium-ion batteries a good energy storage solution?

1. Introduction Lithium-ion batteries (LIBs) attract considerable interest as an energy storage solution in various applications, including e-mobility, stationary, household tools and consumer electronics, thanks to their high energy, power density values and long cycle life .
