Can a solar inverter power a home?

Without a solar inverter, you wouldn't be able to use those solar panels to power your home. A solar inverter's job is simple: It converts the direct current -- the electricity generated by your solar panels -- into alternating current

What is a string inverter?

As the name implies, string inverters connect a set of solar panels, also called a string, to a singular inverter. The inverter will convert the DC electricity from every solar panel connected to that string.
