

SolarTech Power Solutions

Philippine energy storage system supplier

Overview

Where is the first battery-based energy storage facility in the Philippines?

The plant, which will be the first battery-based energy storage facility in the Philippines, will be located next to the Masinloc power plant in Zambales. The energy storage array will enhance grid reliability by providing fast response ancillary services like frequency regulation.

Does the Philippines have a solar battery market?

The government's push to increase solar PV installations includes growing support for residential and commercial solar battery storage systems. Solar battery prices in the Philippines depend on brand, capacity, technology (LiFePO₄ vs. lead-acid), and features like Wi-Fi monitoring, wall-mounting, and cycle life.

What is the Philippine Energy Plan?

The Philippine Energy Plan outlines the goal of reaching 20 GW of renewable energy capacity by 2040 (or 15 GW by 2030), a target that positions solar energy at the center of national development. As of 2021, the country's installed solar power capacity stood at 1.2 GW, with strong momentum expected in the coming years.

How is Bess transforming the Philippine energy industry?

With the commercial operations of approximately 1,000 MW of BESS facilities across 32 locations in the Philippines, we are now ushering in a new era for the Philippine energy industry through significant improvements in grid reliability and the integration of more renewable power sources to the country's diverse energy mix.
