Philippines Energy Storage Investment Project

12.8V 200Ah

Overview

The project, which is strategically located on the Philippines' main island of Luzon, about 100km from Manila, will combine 3.5GWp of solar PV capacity with 4.5GWh of battery energy storage system (BESS).

The project, which is strategically located on the Philippines' main island of Luzon, about 100km from Manila, will combine 3.5GWp of solar PV capacity with 4.5GWh of battery energy storage system (BESS).

LONDON, 6 September 2024: Actis, a leading global investor in sustainable infrastructure, has agreed to enter a strategic partnership with Manila Electric Company (Meralco) and its subsidiary, Solar Philippines New Energy Corporation, to invest in the Terra Solar Project, poised to be the world's.

Infrastructure investor Actis has entered a strategic partnership with the companies behind a 3.5GW solar, 4.5GWh BESS project in the Philippines, one of the largest in the world. The firm has agreed to partner with utility Manila Electric Company (Meralco) and its subsidiary, Solar Philippines New.

In a strategic move valued at approximately \$21 million, Aboitiz Power is integrating BESS technology into its existing thermal plants, a model for clean energy that is being closely watched by national utilities as a blueprint for climate-resilient infrastructure. The groundbreaking for.

UK investment firm Actis has finalised its \$600 million investment in Terra Solar Philippines Inc., securing an equity stake in a ground-breaking GW-scale solar and energy storage project. Known as MTerra Solar, this initiative is set to become the world's largest integrated renewables and energy.

On October 23, 2025, China Energy Engineering Corporation (China Energy) signed the EPC contract for the South Block of the MTerra Solar project with Terra Solar Philippines, Inc. (TSPI). The contract covers 1,050 MWp of photovoltaic capacity and a 1.2 GWh energy storage system. Specifically: The.

A large-scale solar and battery energy storage project in the Philippines is

moving forward faster than expected, with 54% of the first phase completed just eight months after construction began. By the end of June, 778 MW of solar capacity had already been installed—surpassing the initial 750 MW.
