

SolarTech Power Solutions

Portuguese solar energy storage lithium battery manufacturer

Overview

StorSystems is driving the Portuguese energy transition by developing, building, and operating advanced battery storage systems. Battery storage allows power produced now to be stored for use later. It will be essential for a decarbonised and reliable energy network in Portugal. Why should Portugal invest in a battery factory?

“Our factory will not only create new jobs but will also place Portugal at the forefront of the production of batteries for electric vehicles in Europe,” he highlights. According to CALB, “this strategic investment” aims to “reinforce its presence in the European market for electric vehicles (EV) and energy storage systems (BESS)”.

Will Sines contribute to the future of green energy in Portugal?

For the president of the Board of Directors of CALB, Liu Jingyu, quoted in the statement, the project planned for Sines will contribute “to the future of green energy in Portugal” and will support “the transition of the European automotive sector to electric vehicles”.

Where will the new lithium battery factory be built?

In a statement sent to the Lusa news agency, the Chinese company, a global leader in the production of lithium-ion batteries, announced that the project for the construction of the latest generation lithium battery factory will be launched on Monday at the Técnico Innovation Center, in Lisbon.

How much lithium ion will a battery plant produce a year?

oxide a year will a battery plant produce?

The plant, which will be one of Europe's largest and the most sustainable, is set to have an initial annual production capacity between 28,000 and 35,000 tons of battery-grade lithium hydroxide - a critical material required by the lithium-ion battery manufacturing industry, which
