Power Base Station Ranking

Overview

Which power station should I buy?

The Jackery 2000 Plus is the best power station for those who need ample power. While it is pricey at over \$2,000 list price, it has plenty of power, charges impressively fast, and won't let you down in case of an emergency. If your main need is charging devices like phones and laptops, our favorite is the Anker 521.

What makes a good power station?

The best power stations usually feature LiFePO₄ batteries, also known as LFP or lithium iron phosphate. These can be rated for 3,000 charging cycles or more before having significant battery capacity degradation. Manufacturer warranty coverage is an essential consideration when selecting a power station to buy.

Which power station has the best mobility?

The Jackery 300 and Anker 521 ran away with the best mobility scores, thanks to their small form and small battery size. However, for larger power stations, it was hard to ignore the impressive weight-to-power output ratio of the Anker Solix C1000.

How much power does a power station have?

With its 2,042.8Wh capacity (expandable to 5kWh with extra batteries), it can keep essential appliances running during outages or power a weekend camping trip with ease. The balance of capacity, charging speed and portability makes it the most versatile option for people who want one power station to handle multiple scenarios.

How do I choose a power station?

Look for a power station that can handle the combined wattage of the electronics you plan to plug into it. If you want to power a toaster that uses

400 watts simultaneously with a blender that uses 600 watts, then you'll need a power station that has a maximum output of at least 1,000 watts.

Are all power stations the same?

Deals are selected by the CNET Group commerce team, and may be unrelated to this article. With that said, not all power stations are created equal. Some models are large and powerful enough to run a refrigerator for days, while others are designed for portability, offering just enough juice to keep your mobile devices charged for a few hours.
