# Power Storage Industry

## Overview

---

How big is the energy storage industry?

Energy storage systems (ESS) in the U.S. was 27.57 GW in 2022 and is expected to reach 67.01 GW by 2030. The market is estimated to grow at a CAGR of 12.4% over the forecast period. The size of the energy storage industry in the U.S. will be driven by rising electrical applications and the adoption of rigorous energy efficiency standards.

What is the energy storage systems industry?

The energy storage systems industry by technology is segmented into pumped hydro, electro-chemical, electro-mechanical, and thermal. The energy storage systems reached USD 433 billion, USD 535.8 billion and USD 668.7 billion in 2022, 2023 and 2024 respectively.

Why are energy storage technologies important?

They are also strategically important for international competition. KPMG China and the Electric Transportation & Energy Storage Association of the China Electricity Council ('CEC') released the New Energy Storage Technologies Empower Energy Transition report at the 2023 China International Energy Storage Conference.

What are the top 5 energy storage systems companies in 2024?

Top 5 companies including BYD, General Electric, LG Energy Solution, Siemens and Samsung held a market share of over 40% in 2024. Major key players are working to develop cost-effective and wide range of ESS. Among these companies BYD is one of the largest share holding company in the energy storage systems industry.

Do independent energy storage power stations lease capacity?

Independent energy storage stations lease capacity to wind power, PV, and other new energy stations. Capacity leasing is a stable source of income for

owners of independent energy storage power stations. The capacity leased can be seen as energy storage capacity built for new energy projects.

Is China entering a new era of energy storage demand?

Mainland China accounts for most of the global energy storage demand, driven in the near term by regional requirements for new utility-scale wind and solar projects to include energy storage capacity. However, the Chinese market is entering an era of change.
