Price of solar panels installed on building exterior walls

Overview

The price of solar panels changes depending on where you live, but the average for installation is just under \$29,000 or \$2.75 per watt. How much does a solar panel installation cost?

One of the biggest cost factors for your solar panel installation is the size of the system you have installed. System size is measured in kilowatts (kW) and is determined by household energy consumption. The average cost per watt is \$3.04, but larger systems often have a lower cost per watt.

How much does solar cost per square foot?

Average U.S. solar cost per square foot in 2025: \$6 – \$12 after the 30% federal tax credit. Cost per square foot varies by system size, energy use, location, and panel efficiency. The most accurate pricing metric is still cost per watt, but per-sq-ft estimates are helpful for ballpark figures.

How much does a residential solar system cost?

Using these numbers, an average-sized 8-kilowatt residential solar system would cost between \$21,900 – \$26,400. Regional pricing differences, the system size, local installation costs, inclusion of home battery backup, and local incentives are other factors which affect the final cost.

How much does a 1500 square foot Solar System cost?

The average solar system costs around \$27,500 before incentives, and around \$19,250 after the 30% tax credit for a 1,500 square foot house, according to a data analysis by Solar.com. That boils down to a rate of around \$12.80 per square foot of living space. Related reading: [How Many Solar Panels Do I Need for a 1,500 Square Foot Home?](#)
