Take control of your energy costs with solar power. Solar panels generate “free” electricity, but installing a system still costs money. A typical American household needs a 10-kilowatt (kW) system to adequately power their home, which costs \$28,241 in 2025. That price effectively drops to \$19,873.

You'll pay an average of \$13,884 to install a 5 kilowatt (kW) solar panel system in New York before any available incentives. Solar panels typically last 25-30 years, generating free electricity and protecting you from rising utility rates for decades. Compare multiple offers and save up to 20% Why.

Solar power system cost based on your location, roof, power usage, and current local offers. Last updated: October 2025 As of 2025, the average cost of solar panels in New York is \$3.30 per watt, making a typical 6.9 kilowatt (kW) solar system \$16,632 after claiming the 30% federal solar tax credit.

The cost of solar panels in New York reflects this sunny opportunity, ranging between \$13,300 and \$21,000 for the average system. While it may cost more to install solar panel systems in New York than other states, local tax incentives, financing programs and unique net metering options can balance.

Installing solar panels can be one of the most impactful improvements you can make - allowing you to take control of electricity bills, protect your home from outages and increase the value of your property while producing energy directly on the roof. How much does it cost to install and manage.
