Qatar Gravity Energy Storage Project

Overview

The project is designed to capture and permanently store up to 4.1 million metric tons of CO₂ per year, significantly expanding the country's CCS portfolio. QatarEnergy said the project reinforces its strategy to integrate large-scale carbon management across its LNG value chain.

The project is designed to capture and permanently store up to 4.1 million metric tons of CO₂ per year, significantly expanding the country's CCS portfolio. QatarEnergy said the project reinforces its strategy to integrate large-scale carbon management across its LNG value chain.

Samsung C&T has been awarded the engineering, procurement and construction (EPC) contract for a new carbon capture and storage (CCS) project in Qatar, set to become one of the largest globally once operational. QatarEnergy announced the award for the facility, which will serve existing liquefied.

QatarEnergy has awarded Samsung C&T Corporation the engineering, procurement, and construction (EPC) contract for a landmark carbon capture and sequestration (CCS) project to serve QatarEnergy's existing LNG production facilities in Ras Laffan Industrial City. The new project will capture and.

Qatar Energy has awarded Samsung C&T the engineering, procurement and construction (EPC) contract for a major CO₂ capture, sequestration and storage project, which will serve Qatar Energy's existing LNG production facilities in Ras Laffan Industrial City. Qatar Energy explained in a statement today.

Qatar's state-owned oil and gas giant QatarEnergy has chosen Samsung C&T Corporation as the contractor, which will breathe life into a giant carbon capture and sequestration (CCS) project designed to serve the Persian Gulf state's existing liquefied natural gas (LNG) production facilities.

QatarEnergy has awarded Samsung C&T Corporation the engineering, procurement, and construction (EPC) contract for a landmark carbon capture

and sequestration (CCS) project to serve QatarEnergy's existing LNG production facilities in Ras Laffan Industrial City. The new project will capture and.

QatarEnergy has taken a major step toward a cleaner energy future by awarding an engineering, procurement, and construction (EPC) contract to Samsung C&T Corporation. The project, based in Ras Laffan Industrial City, will capture and sequester up to 4.1 million tons of carbon dioxide (CO₂) every.
