Rated power 4kw inverter parameters

Overview

What is a 4 kW solar pump inverter?

4 kW solar pump inverter for sale, AC output current 13A, and output frequency 0~400 (Hz). With the IP20 protection class, the pump inverter has RS485 communication mode and vibration is less than 5.9m/s^2 (0.6 g). The solar pump inverter with the recommended MPPT range (250V, 400V) can work at (-10°C, 40°C). Easy to use and install.

What are inverter specifications?

Specifications provide the values of operating parameters for a given inverter. Common specifications are discussed below. Some or all of the specifications usually appear on the inverter data sheet. Maximum AC output power This is the maximum power the inverter can supply to a load on a steady basis at a specified output voltage.

Which inverter can take DC & AC input?

For On-Grid Systems, generally the DC capacity and AC capacity (of inverter) are very much similar. Hence here we shall look for inverter which can take min. 4.225kWp (DC) input. Looking at datasheet, 4.0kW inverter (Model: KSY 4kW) has “Max Peak DC Input Power” of 4.8kWp and hence that inverter serves the purpose.

How much power does a commercial inverter have?

Large residential inverters are in the 3,000 W to 6,000 W range, with single-phase power. Small commercial inverters Small commercial inverters are in the 13 kW to 15 kW range and can include three-phase power. Large commercial inverters Large commercial inverters are in the 60 kW to 100 kW range.

Which solar pump inverter is best?

The solar pump inverter with the recommended MPPT range (250V, 400V) can

work at (-10°C, 40°C). Easy to use and install. Good performance 4 kW solar pump inverter, using advanced Maximum Power Point Tracking control technology, real-time detection of solar panels power voltage.

How to choose a PV inverter?

When selecting an inverter, it is essential to ensure that its maximum DC current specification meets the requirements of thin-film modules. The current of each MPPT-connected PV string should remain below the inverter's DC current limit to prevent overcurrent damage.
