

SolarTech Power Solutions

Rectangular solar panel solar integrated machine

Overview

What shapes can Voltaic Systems make solar panels in?

At Voltaic, we manufacture custom and standard small solar panels and while most are rectangular, we have experience designing and deploying a full range of interesting shapes and sizes.

Why are standard small solar panels rectangular?

Most standard small solar panels are rectangular in shape because they are easier to manufacture and offer the most efficient use of space. Each solar panel is constructed of one or more strings (in series) of individual solar cells, strung in a straight line using equally sized cell pieces.

What shapes can custom small solar panels be?

At Voltaic, we manufacture custom and standard small solar panels and while most are rectangular, we have experience designing and deploying a full range of interesting shapes and sizes. Most standard small solar panels are rectangular in shape because they are easier to manufacture and offer the most efficient use of space.

How are solar cells arranged in a panel?

Each solar panel is constructed of one or more strings (in series) of individual solar cells. Strung by hand or machine, the strings are in a straight line using equally sized cell pieces. Most standard small solar panels are rectangular in shape because they are easier to manufacture and offer the most efficient use of space.

How are solar panels made?

These lines consist of several machines working together to produce solar panels from start to finish. The use of robots and artificial intelligence in solar panel production is also on the rise and will play a big role in further reducing costs and improving efficiency for manufacturers.

Where are origami solar patented steel frames made?

Origami Solar's manufacturing partners will produce Origami Solar patented steel frames from multiple locations across the United States offering redundancy, reliability, and optimal logistics. Manufacturing is ready to scale in the US and Europe and can be adapted for other regions.
