Russian 5G communication base station inverter construction project

Overview

What is MTS' new 5G base station 'Irteya'?

MTS presented the first Russian 5G base station "Irteya" at the All-Russian CIPR-2025 conference. According to the company's press service, the new generation of base stations uses the OpenRAN open standards principle, in which part of the work is performed in cloud data centers, rather than directly at the station.

Will Irteya develop 4G LTE/5G base stations based on OpenRAN architecture?

Reported by Srikapardhi September 5th, 2023 at 08:46 pm 0 Irteya, a subsidiary of Russian mobile operator MTS, plans to develop 4G LTE/5G base stations based on OpenRAN architecture.

What are the components of a 5G base station?

Baseband Unit (BBU): Handles baseband signal processing. Remote Radio Unit (RRU): Converts signals to radio frequencies for transmission. Active Antenna Unit (AAU): Integrates RRU and antenna for 5G-era efficiency. 2. Power Supply System This acts as the "blood supply" of the base station, ensuring uninterrupted power. It includes:

How many base stations does Russia need a year?

According to him, Russian operators annually need about 60-80 thousand new base stations. Demand will increase when the deployment of 5G networks begins in Russia, he does not exclude. Read more in the exclusive Izvestia article:.

When will 5G/IMT-2020 be implemented in Russia?

In accordance with the program passport from 12/24/2018, the radio frequency bands for creating 5G radio communication networks should be determined in Russia and a draft for radio frequency release roadmap for the implementation of 5G/IMT-2020 should be developed until 09/30/2019.

How many 5G base stations are there in South Korea?

In South Korea, 12 thousand 5G base stations (BS) were installed. By mid-2019, LG Uplus plans to install another 50 thousand base stations. Shanghai has become a region where there is both 5G coverage and a gigabit broadband data network.
