Sao Tome and Principe switches to solar site energy

Overview

The island nation of Sao Tome and Principe switched on the initial phase of its first 2 MW solar project in August. Construction of 1.4 MW of PV capacity is now underway at two airports, and developers plan to install a total of 1.7 MW by 2023.

São Tomé and Príncipe, June 04, 2025. São Tomé and Príncipe takes another concrete step towards the energy transition with the inauguration of the 1.2 megawatt photovoltaic solar park, integrated in the Santo Amaro power plant, which was attended by several individuals, namely the HE Prime-Minister.

With the inauguration of the Santo Amaro photovoltaic solar park with a total electric capacity of 1.7-megawatt, the Government of São Tomé and Príncipe has taken another concrete step toward achieving its national renewable energy targets and advancing the implementation of its NDC. The ceremony.

Last week, São Tomé and Príncipe (STP) officially joined AMP and hosted a two-day project launch workshop, becoming one of the newest national projects under active implementation. Although around 70% of rural areas in STP are electrified, many communities remain off-grid or face unreliable supply.

eatest opportunities to São Tomé and Príncipe. On one hand, global climate change poses a direct threat to our way of life; on the other, continued reliance on outdated fossil energy sources, uch as imported diesel, is no longer sustainable. At present, the energy expenditures of São Tomé and.
