Selling energy storage equipment

Overview

How much does the energy storage system cost?

The energy storage system is a 4MW, 32MWh NaS battery consisting of 80 modules, each weighing 3 600 kg. The total cost of the battery system was USD 25 million and included USD 10 million for construction of the building to house the batteries (built by Burns & McDonnell) and the new substation at Alamito Creek.

Can I sell energy back to the grid?

In summary, selling energy back to the grid can be complicated and expensive. However, there are other options available to commercial and residential consumers that are looking to reduce energy costs. Our team understands the electricity grids in the U.S. and can help you navigate selling energy back to the grid.

How do you sell electricity to the grid?

One way to legally sell electricity to the grid is to register as a generator, obtain an electricity-generating license, and begin producing power. There are several ways that license generators can make power and earn income: These projects take many years of local, state, and federal approval and can cost upwards of billions of dollars.

Can I sell power to the grid without a generator?

As we stated previously, you cannot sell power to the grid without being a registered generator. You can, however, receive billing credits for excess power from a solar system or wind turbine. Read on to learn about the different ways to sell back power. This is the most common way consumers believe they can sell electricity to the grid.

How much money can you earn from selling electricity?

The amount of money you can earn from selling electricity depends on your

place in the market. Registered electricity generation plants earn wholesale electricity prices for their power, while consumers can earn retail credits. Let's look at each in more detail.
