The West African nation, where over 60% of the population have access to electricity—one of the highest in the sub region—aims to achieve universal energy access by 2030. Senegal has begun commercial operations at a new solar energy facility that combines photovoltaic power with lithium-ion battery.

Potential for Energy Storage Solutions in Senegal: Battery Storage and Pumped Hydro Storage Senegal's energy sector is undergoing significant transformation, driven by the need to integrate renewable energy sources and ensure a stable and reliable power supply. Energy storage solutions.

Senegal is rapidly advancing its energy transition through large-scale infrastructure, regional gas integration and ambitious electrification goals. With an electricity access rate of 84% and a target of universal access by this year, the country is investing in renewable energy, modern gas.

Discover the MEGATRON Series - 50 to 200kW Battery Energy Storage Systems (BESS) tailored for commercial and industrial applications. These systems are install-ready and cost-effective, offering on-grid, hybrid, and off-grid capabilities. The project will provide clean, reliable energy for 235,000.

Located in Bokhol, Dagana department, northern Senegal, the project is connected to the grid operated by Senelec. Independent power producer, Africa REN, has commissioned a 20MW of solar PV power plant with a 10MW/20MWh battery energy storage system (BESS) in Senegal. Named the Walo Storage.
