# Senegal s new power storage policy

## Overview

---

Dakar, Senegal, August 7, 2025 – Just one year after laying the foundation stone, Africa REN announces the commercial commissioning of Walo Storage, the first photovoltaic facility in West Africa combined with lithium-ion battery storage, designed for frequency regulation and to meet.

Dakar, Senegal, August 7, 2025 – Just one year after laying the foundation stone, Africa REN announces the commercial commissioning of Walo Storage, the first photovoltaic facility in West Africa combined with lithium-ion battery storage, designed for frequency regulation and to meet.

The Walo Storage facility, commissioned on July 14th, represents West Africa's first solar power plant integrated with battery storage specifically for grid frequency regulation. A key feature of the Walo Storage facility is its ability to provide critical stability and backup power during outages.

Cairo, Egypt and Abu Dhabi, UAE - 13 November 2023: Infinity Power, a joint venture between Egypt's Infinity and UAE's Masdar, announced today the signing of a 20-year Capacity Change Agreement with Senelec, Senegal's national electricity company to supply 40MW through a battery energy storage.

Our mission is to create change toward sustainable futures that protect and enhance the environment, human well-being, and social equity. We seek to adopt an inter-disciplinary approach to our work and engage our partner organisations in a collaborative process that emphasises strategic.

The national electric utility of Senegal, Senelec, has signed a 20-year capacity change agreement (CCA) with developer Infinity Power for a 40MW/160MWh battery energy storage system (BESS) project. The four-hour BESS project, which will have a power rating of 40MW and an energy storage capacity of.

Dakar, Senegal, August 7, 2025 – Just one year after laying the foundation stone, Africa REN announces the commercial commissioning of Walo Storage, the first photovoltaic facility in West Africa combined with lithium-ion battery storage, designed for frequency regulation and to meet local energy.

The energy storage pact will begin construction in early 2024 at the Tobène substation in Thies and become operational in 2025. Once completed, the system will be one of the largest in West Africa and help Senegal avoid approximately 37,000 tonnes of carbon dioxide emissions each year. Senegal's. When will a battery energy storage system start in Senegal?

Construction of the battery energy storage system is expected to commence in early 2024 at the Tobène substation in Thies and is expected to become operational in 2025. Once complete, it will be one of the largest of its kind in West Africa, and will help Senegal to avoid approximately 37,000 tonnes of carbon dioxide emissions each year.

What is Senegal's energy policy?

The IEA's Energy Policy Review of Senegal 2023, published today, finds that energy is at the heart of Senegal's 2035 strategy for accelerating sustainable development and economic growth known as the Plan Sénégal Émergent (PSE), or the Emerging Senegal Plan.

Why is battery storage important in Senegal?

Battery storage offers incredible opportunities for Senegal to reap the benefits of renewables, while ensuring people get a secure, reliable supply of energy. We are excited to begin a promising new chapter in Senegal and further strengthen our work in the renewable energy sector.”.

How has Senegal reformed its energy sector?

Since the launch of the Plan Sénégal Émergent, Senegal has adopted reforms designed to attract foreign investment in its energy sector and boost participation from the private sector, while leveraging significant support from development finance institutions.

Is Senegal a good country for energy transitions?

Senegal is a strong advocate for just energy transitions. The country has already met the wind and solar targets it established for 2025 under its most recent Nationally Determined Contribution to the Paris Agreement, and it has joined the Global Methane Pledge to reduce the world's methane emissions 30% from 2020 levels by 2030.

Is Senegal preparing a five-year strategy for 2028?

The analysis comes as Senegal is taking stock of progress made between 2019 and 2023 and laying out its strategy for the next five-year period, which runs through 2028.
