

## SolarTech Power Solutions

# Slovakia household solar off-grid energy storage system

 **TAX FREE**    

**Product Model**  
HJ-ESS-215A(100KW/215KWh)  
HJ-ESS-115A(50KW 115KWh)

**Dimensions**  
1600\*1280\*2200mm  
1600\*1200\*2000mm

**Rated Battery Capacity**  
215KWH/115KWH

**Battery Cooling Method**  
Air Cooled/Liquid Cooled

**ENERGY STORAGE SYSTEM**

## Overview

---

Who is Slovak solar?

Slovak Solar s.r.o. is a leading photovoltaic wholesaler in Slovakia, Czech Republic and Austria, with a vision to create a sustainable energy future. We started our journey in 2009 with the main idea – to provide companies specialised in the installation of solar systems with access to first-class photovoltaic products, all from one place.

How has solar technology changed in Slovakia?

For the second consecutive year, Slovakia has witnessed notable acceleration in the solar PV sector. This growth has been primarily driven by the declining cost of solar technology, coupled with relatively high energy prices faced by businesses, which has increased interest in PV systems.

Why should you choose Slovak solar?

At Slovak Solar, we believe that progress comes from constant innovation. From day one, we've been breaking new ground in Slovakia's solar energy sector. We were one of the first company in Slovakia to install Building-Integrated Photovoltaics (BIPV).

What is the share of RES-E in Slovakia's electricity generation?

As of the end of 2024, the share of RES-E in Slovakia's electricity generation increased by a percentage point compared to the previous year, reaching 24.2%. Hydropower continues to lead, comprising 66% of the total installed renewable capacity, followed by solar PV at 29% and bioenergy at 5%.

How many solar PV plants are there in Slovakia?

There are currently 479 utility-scale ground-mounted solar PV plants with almost 586 MW of installed capacity and 528 MW of rooftop PV systems in Slovakia. The largest solar PV plant to-date was commissioned in 2024 in the municipality of Iliašovce (Košice Region) with installed power at 6.3 MW.

How much solar power does Slovakia have in 2024?

At the end of 2024, solar PV market in Slovakia peaked at a cumulative installed power of 1,114 MW. This total is a combination of DC and AC power owing to the fact that until 2022 all data were reported only at DC side and from 2023 onwards new installations are defined at AC nominal inverter output.
