

## SolarTech Power Solutions

# Slovenia deep solar container

## Overview

---

Slovenian energy company HSE is developing a 140 MW floating solar project, with work currently underway on spatial planning activities. The solar plant is set to become Slovenia's largest solar project and Europe's largest floating solar array to date.

Slovenian energy company HSE is developing a 140 MW floating solar project, with work currently underway on spatial planning activities. The solar plant is set to become Slovenia's largest solar project and Europe's largest floating solar array to date.

Slovenia's state-owned power company HSE is developing a massive floating solar plant on a former mining lake. Slovenia is set to take a major step in renewable energy with a new floating solar project led by the state-owned power company Holding Slovenske Elektrarne (HSE). The 140 MW Družmirje.

Slovenian energy company HSE is developing a 140 MW floating solar project, with work currently underway on spatial planning activities. The solar plant is set to become Slovenia's largest solar project and Europe's largest floating solar array to date. Slovenia's Holding Slovenske Elektrarne.

Slovenia's state-owned power generation company, Holding Slovenske Elektrarne (HSE), is developing a 140 MW floating solar power plant at Lake Družmirje, near Šoštanj in northern Slovenia. The lake, formed from decades of lignite mining, will have up to half its surface covered by the Družmirje.

Slovenia is advancing plans for the Družmirje Floating Solar Power Plant (Družmirje FSPP), a 140 MW project set to become the country's first and Europe's largest floating solar array to date. The plant, located on Lake Družmirje near Šoštanj, is expected to generate 140 GWh of electricity.

Slovenian state-owned energy utility Holding Slovenske elektrarne - HSE said it would cover a part of the Družmirje artificial lake with floating solar panels. The capacity could reach as much as 140 MW. The location is next to the country's only coal mine and power plant. In line with the national.

Massive 140 MW Floating Solar Plant in Slovenia Set to Become Europe's Largest Slovenia is set to take a major step in renewable energy with a new floating solar plant on the horizon. With plans for a massive 140 MW capacity, this project is poised to become the largest floating solar plant in.
