

SolarTech Power Solutions

Sodium energy storage equipment complete set manufacturer

Overview

How many sodium battery production bases are there?

This company has four major sodium battery production bases during 5 years, increasing its battery materials and battery cell manufacturing capabilities. In 2022, it launched the world's first 1,000-ton-scale sodium-ion battery cathode material production line and first GWh-scale sodium-ion battery production line.

How big is the sodium-ion battery market?

According to projections by the leading global market research firm MarketsandMarkets, the global sodium-ion battery market is expected to grow from USD 0.67 billion in 2025 to USD 2.01 billion by 2030, at a CAGR of 24.7%. Sodium-ion batteries are becoming a cost-effective and sustainable choice over lithium-ion batteries.

Are sodium ion batteries the future of energy storage?

The development of sodium-ion batteries marks a journey of innovation, edging closer to rivaling lithium counterparts and reshaping the future of energy storage. Nadion Energy is proudly powered by PHD Energy, a leading manufacturer of premium battery technologies. Sodium ion batteries utilize sodium ions for charge transport between electrodes.

What is a sodium ion battery (SIB)?

We develop advanced Sodium-ion Battery (SIB) packs to power a cleaner, more efficient world. From mobility to stationary storage, our products support a wide range of applications, driving innovation in energy storage solutions. Why Sodium Ion Batteries?

Sodium Ion Batteries (SIBs) are up to 60% lighter in weight than lead-acid batteries.

What is sodium ion battery?

Sodium-ion batteries of 48V60Ah and 48V100Ah developed by Nadion Energy is for LEV (Low-speed Electric Vehicle) like Golf cart. Stay up to date with the latest advancements in Sodium-Ion Battery technology by following our News and Blogs.

Who makes sodium ion batteries?

Faradion, founded in Britain, became the world's first sodium ion batteries company in 2011, manufacturing commercialized sodium-ion batteries. This company makes sodium-ion batteries as layered metal oxide and hard carbon organic electrolyte systems, prioritizing the development of low-cost, high-energy-density batteries.
