Where is a solar inverter located?

Your solar inverter is typically a large box near the main electrical service panel along an exterior wall or inside the garage. After identifying your solar inverter, find the AC/DC toggle switch and power down your inverter. Pro Tip: Solar energy systems with microinverters can skip this step.

What size solar inverter should I buy?

The size of a solar inverter is usually measured in Watts. When purchasing a grid tie power inverter, you have to make sure it suits the size of your solar panel system. For example, if your solar panel array has a combined power of 5kW then a 5,000 W inverter should be just right for it.

What is a solar inverter?

A solar inverter or photovoltaic (PV) inverter is a type of power inverter that converts the variable direct current (DC) output of a photovoltaic solar panel into a utility frequency alternating current (AC) that can be fed into a commercial electrical grid or used by a local, off-grid electrical network.
